1	SKI	Ski software (FIS/SWISS SKI/FFS/DSV/ÖSV)

Ski Timing installation allowing for the timekeeping of a ski race.

The CHRONOPRINTER CP540 is the culmination of many unique design advantages, confirming TAG Heuer's extensive knowledge and experience in the field of highly precise time measurement for sport.

The numerous integrated timing modes such as NET TIME, NET TIME + 2 INTER, PARALLEL SEQUENTIAL, PARALLEL DIFFERENTIAL, TRAINING... etc. will satisfy the most demanding timekeeper. The CP 540 is able to accommodate the majority of sports disciplines operating as a stand-alone unit. When connected to a PC running TAG Heuer's extensive range of race management software, it is also the ideal time base for all professional sports-timing.

Priced well below other alpha-numeric displays currently offered, the HL980 can be used alone as a simple 8-digit time display board or combined with several modules to create a multi-column, multi-line information board, complete with name, running time, penalty, ranking, and even club or national affiliation. In between timing sessions, it can show event information and even advertising messages! The HL980 is a must for every organizer who wishes to produce a professional event.
