How much room is available for imprinting?

The amount of space available for imprinting on your bib is dependent upon the overall size of your bib (junior, standard, large etc.), the presence or absence of a number, and the size of the number used. The chart below details the available imprint areas for each bib style both with a number (A) and without (B). Column A assumes the use of a standard 4 1/2" number centered top to bottom. Movement of the number up or down will result in a commensurate increase or decrease in the imprint areas above and below.
