

ULTRA-TECH™ LIGHTING

SNOW-BRIGHT™

SNBT-FL-150WC1

- Snow-Bright™ LUMENEC™ tuned spectrum
- Color Rendition Index (CRI) > 90
- 100,000 hour life cycle
- 110V ~ 277V auto-sensing ballast
- Instant strike/re-strike
- Large format full dispersion light source
- Full diffusion nano particle reflector
- Powder-coated all-weather aluminum
- IP65 rated WF2 anti-corrosion grade
- 150mph wind resistance

The Snow-Bright™ 150-watt Wide Area Dispersion floodlight is the ultimate replacement fixture for 400-watt metal halide and high pressure sodium box-format floods. With energy savings of 70%, this light is perfect for ski slopes, walkways, tubing parks, cross-country trails, parking lots, and outdoor venues. The unique full spectrum full diffusion design is capable of replacing 400 to 500-watt high pressure sodium and metal halide fixtures for energy savings of up to 75%. Unique reflector geometry provides precision cut-off and minimal light pollution. Mercury is a solid encapsulated amalgam that makes Snow-Bright™ environmentally friendly and safe. No special handling is required. No hazardous material disposal is necessary.

Snow-Bright™ light actually reflects internally within snow crystals to provide stunning resolution with very low energy consumption. Instant strike means never having to wait for a warm-up or cool-down. The SNBT-FL-150WC1 will not disturb nocturnal wildlife such as owls and moose. Equally important, it is a neighbor-friendly fixture that can be focused away from surrounding buildings and homes. Snow-Bright™ lights are not affected by temperature.
